Dear Jane Street Recruiting Team,

I'm writing to apply for the **Quantitative Trading Internship** at Jane Street. I've recently developed a strong interest in financial markets and am eager to explore the field of quantitative trading more deeply through this opportunity.

While I'm still early in my journey, I've been actively following macroeconomic trends — including market volatility, interest rates, global trade dynamics, and the broader effects of globalization and protectionism. These observations have made me curious about the decision-making process behind trades and how quantitative models respond to real-world events.

What excites me most about Jane Street is the emphasis on thoughtful problem solving, collaboration, and intellectual rigour. I enjoy tackling logical and mathematical puzzles, and I'm currently working on strengthening my problem solving and technical skills to prepare myself for the fast-paced, analytical nature of trading. This internship would be a meaningful step toward understanding the field firsthand and learning from some of the best minds in the industry.

Thank you for considering my application. I would be grateful for the opportunity to further demonstrate my curiosity and motivation to grow in this space.

Sincerely,
Adithya Jaiswal
